

SHIV CHIDAMBAR INDUSTRIES

MANUFACTURER OF CASTINGS AND ALLOY

About Us

At **Shiv Chidambar Industries**, we specialize in high-quality Alloys and GDC castings that power industries worldwide. With years of expertise and advanced technology, we deliver durable, high-performance metal solutions tailored to your exact specifications. Our products meet the highest international strength, reliability, and efficiency in every cast.

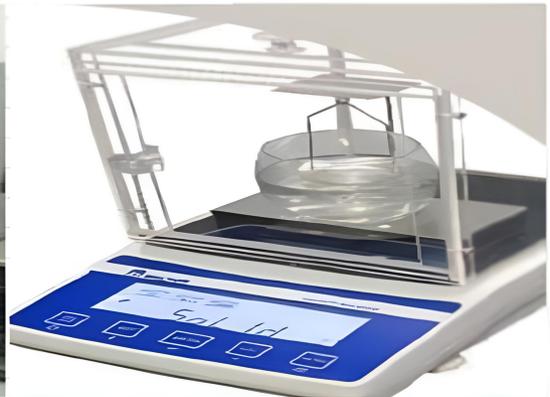

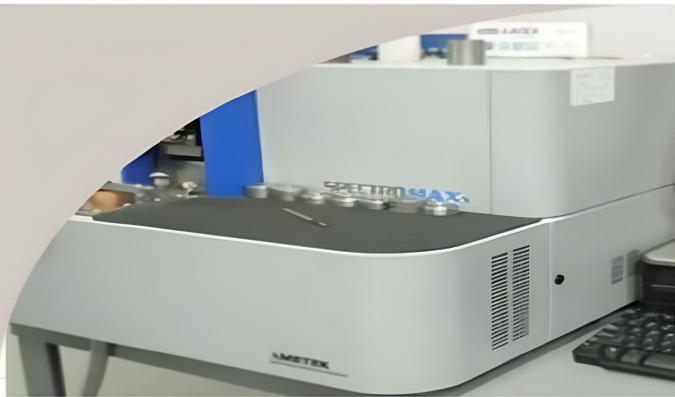

Shiv Chidambar Industries, established in 2017, is an **IATF 16949:2016** certified manufacturer specializing in Aluminium alloys and Gravity Die Castings.

Gravity Die Casting:

We are a leading manufacturer specializing in high-quality Gravity Die Casting solutions. Our advanced casting division is equipped with a robust production capacity of 200 MT, enabling us to consistently deliver precision-engineered components with superior quality, reliability, and on-time performance. Backed by strong technical expertise and stringent quality control systems, we are well-positioned to meet diverse customer requirements across industries.

Sr. No	Name Of Machines	Qty .	Capacity, Size & Functions
1	Tilting GDC Machines	2	Bed Size - 700*750mm size
2	Stationary GDC Machines	3	Bed Size - 1100*1100 mm 700*1000mm 500*750mm
3	Rotary Type Core Shooter	1	Bed Size - 500*550mm
4	Electric Melting Furnace	1	500Kg Capacity
5	Oil Fired Melting Furnace	2	500Kg Capacity each
6	Degassing Unit	1	For Better Metal Treatment.
7	Short Blasting Machine	1	500Kg capacity of bath.
8	Leak testing machine	1	-
9	CNC Machines	2	For In-house Machining Process

Quality Laboratory Facilities

Sr. No.	Equipment / Facility	Purpose / Application
1	German Make AMETEK SPECTROMAXx Spectrometer	Accurate chemical composition analysis of aluminium alloys to ensure material conformity.
2	Hardness Testing Machine	Measurement and verification of casting hardness as per specified standards.
3	Leak Testing Machine	Detection of leakage in pressure-tight and critical castings.
4	Dimensional Inspection Instruments (Height Gauge & Vernier Calipers)	Precise dimensional measurement and inspection for accuracy and consistency.
5	Density Index Machine, Vacuum Test Machine & Degassing Units	Improvement and monitoring of molten metal quality by controlling gas content and porosity.
6	Heat Treatment Facility	Heat treatment of castings to achieve required mechanical properties, if applicable.

Alloy Division

In Our alloy Division, We have a production capacity of 600MT Per Month supported by:

Sr. No.	Name Of Machines	Qty	Capacity
1	Oil Fired Furnaces	4	1000kg per Heat
2	Skelnor Furnace	1	2000Kg Capacity
3	Chip Compactor Machine	1	600Kg/hr
4	Iron Separator	4	500Kg/hr
